

SECU LAYER

www.seculayer.co.kr

SecuLayer is specialized in big data technology for cybersecurity. Established in 2012 by computer programmers and engineers who have hands-on industry experiences over decades, the company focuses on delivering big data integrated log management solutions to manage data from ALL devices, and utilizing AI technology to achieve automated security management. With growing list of customers and unique technological references, SecuLayer continues to investigate in talent and cutting-edge technologies. Conventional methodology to cope with cyber incidents focuses on reactive and passive responses to threats, yet it's incompetent for ever-evolving today's threat environment. Powered by advanced technologies in big data and artificial intelligence, their vision is to uncover the unknown threats and vulnerabilities, and achieve automated security operation. SecuLayer aims to provide adaptive security platform that can proactively prevent and predict threats in real time, so organizations can conduct security investigation at ease. SecuLayer's core value lies on the trust among our team members, customers and technology.
